Don't Overdo It When You Go Caravanning

Appliances are usually plugged in directly to your generator, or at the very least, to a heavy-duty extension cord. However, you need to be careful about how many appliances are plugged in at once.

This is very easy to do when you are away with the family and everyone wants to charge electrical devices at the same time. Overloading can result in overheating, which in turn can lead to a myriad of problems. If you need to plug multiple appliances into your generator, just make sure the sum of power required is equivalent to the power capacity of your unit. We have a handy form to help you work it all out.

MX4500iS

Barcode: 9356905000159

Home GENERATORS

4.5 kVA / 4500W Pure Sine Wave Digital Inverter Generator

Li-ION Battery

SUPER SILENT

- Digital inverter technology
- Pure sine wave power for sensitive electronic appliances / devices
- Parallel connection cable included
- Low noise 62db
- 5V 2.1 Amp USB charging
- Fuel economic low idle mode
- Engine smart control reduces engine speed depending on size of load for fuel efficiency
- Quick release telescopic handle and wheels for easy transportation

DOUBLE YOUR POWER

Double your power by connecting 2 generators in parallel

Technical Information

Voltage (V)	240V
Amperage (A)	15.4A
Displacement (cc)	223cc
Fuel Tank Capacity (L)	10L
Rated Power (Watts)	3700W
Max. Power (Watts)	4500W

Noise Level (dB's) at 7m @ 75% Load	62
Weight (Net)	52kg
Ignition	Electric/Recoil
Rated Frequency	50Hz
Cont. Running Time @50% Load	9 hrs
Cont. Running Time @100% Load.	6.5 hrs

Generator Dimensions

Length 605mm | Width 488mm | Height 565mm | Weight 52kg

Box Dimensions

Length 650mm | Width 550mm | Height 585mm | Weight 57kg
